

Getman Announces Sandvik Mining and Rock Technology as Exclusive Distributor for Underground Mining Equipment in Eastern United States

Bangor, MI, USA – September 13, 2016 - Getman Corporation is pleased to announce that as of November 1st, 2016, Sandvik Mining and Rock Technology will become the exclusive distributor of Getman underground mining equipment in the Eastern US. The change will affect those customers currently serviced by Getman directly.

“We are excited to bring the Sandvik Mining and Rock Technology aftermarket support and services to our customers in the Eastern United States. We enjoyed the existing direct relationship, but believe Sandvik will provide a superior level of service once engaged” **says Erik VanAllen, President and CEO of Getman Corporation.**

Joining world-class Getman product with industry leading Sandvik support in the Eastern US creates a compelling value proposition for new and existing customers.

About Getman Corporation

Getman Corporation, based in Bangor, MI, USA, is a market leading supplier and worldwide of production and production support equipment to the underground mining industry. With a focus on helping miners work safely and efficiently in their everyday roles, Getman has spent over 60 years bringing high-quality, long-lasting solutions to underground mines. Getman's product range includes scissor lifts, explosive chargers, logistic support vehicles, lubrication trucks, multi-application pallet handlers, mechanical scalers, concrete spraying and transport vehicles and custom design support vehicles. Over the years Getman has delivered thousands of products to hundreds of underground mines throughout the world.
