

Getman Announces Sandvik Mining and Rock Technology as Exclusive Distributor for Underground Mining Equipment in Mali and Estonia

Bangor, MI, USA – October 19, 2016 - Getman Corporation is pleased to announce that Sandvik Mining and Rock Technology has become the exclusive distributor of Getman underground mining equipment in the countries of Mali and Estonia. Sandvik will assume the role of sole authorized distributor of new equipment, aftermarket services, repair parts and training for all Getman underground mining equipment operating in Mali and Estonia.

“Sandvik is known worldwide for providing excellent customer service and support. We are pleased to start working with them in Mali and Estonia.” says Erik VanAllen, President and CEO of Getman Corporation. *“Our partnership with Sandvik in these markets will allow for improved parts availability and equipment uptime resulting in greater value over the life of their Getman fleet.”*

About Getman Corporation

Getman Corporation, based in Bangor, MI, USA, is a market leading supplier worldwide of production and production support equipment to the underground mining industry. With a focus on helping miners work safely and efficiently in their everyday roles, Getman has spent over 60 years bringing high-quality, long-lasting solutions to underground mines. Getman's product range includes scissor lifts, explosive chargers, logistic support vehicles, lubrication trucks, multi-application pallet handlers, mechanical scalers, concrete spraying and transport vehicles and custom design support vehicles. Over the years Getman has delivered thousands of products to hundreds of underground mines throughout the world.
